

**Nasser M. F. El-Ghandour, MD**

Editor In-Chief of the Pan Arab Journal of Neurosurgery  
Department of Neurosurgery, Faculty of Medicine, Cairo University, Cairo, EGYPT

**Received:** 12 June 2023 / **Accepted:** 12 June 2023 / **Published online:** 19 June 2023

### Dear Colleagues

Science's spirit is to change the way of thinking of scientists regarding the world. There is no surprise that the rapid evolution of the scientific neurosurgery research during the last two decades has changed fundamentally the way of treatment of neurosurgical diseases. The Pan Arab Journal of Neurosurgery (PAJN) is striving to follow the most updated research in the field of neurosurgery. The PAJN encompasses all areas related to neurosurgical diseases including basic science, oncology, trauma, vascular and endovascular, skull base, epilepsy, functional, peripheral nerves, endoscopy, spine, craniofacial anomalies, pediatric, and pain management research. The opportunities to improve are endless. The PAJN aims to become the home of manuscripts from Arab countries and from all over the world to bridge the gap between basic science and clinical research on neurosurgical diseases. Our aim is to be accessible to researchers from all over the world with the

emphasis on scientific clarity and articles on the advances in the neurosurgical field. We understand the limited research budgets for researchers from developing countries. The PAJN believes in publishing manuscripts free of charge to support authors from all over the world, especially from lower-income countries. To date, we have published 38 articles that were downloaded greater than 5,700 times. This is in line with our aim to effectively promote our authors' work.

I would like to thank all the editorial board members and reviewers for their time during the last 30 months. The editorial team is on firm footing to continuously promote the PAJN. I would like to extend my sincere appreciation to the readers and authors from all over the world for your trust in the PAJN. I assure you that we will continue to deliver the highest quality content publications to the Neurosurgical Community from the Arab Countries and around the globe through the vehicle of the PAJN.
