### Dear Colleagues

I am pleased to celebrate the third anniversary of the Pan Arab Journal of Neurosurgery (PAJN) with you. Our inaugural issue was published in June 2021, and I am delighted to mark the fourth year since we relaunched the journal in January 2021.

I am excited to announce the publication of the June 2024 issue, featuring diverse topics authored from countries such as Bangladesh, Egypt, India, Italy, Nepal, Saudi Arabia, Tunisia and Turkey. This year, we received an increased number of submissions, allowing us to select the most distinguished articles for publication.

All articles published in the PAJN are freely accessible through our open-access platform. Our goal is to advance medical education and science, and this open access platform has significantly increased the visibility of our journal's articles. To date, we have published 77 articles, which have been downloaded over 12,047 times.

We remain committed to engaging young neurosurgeons and encouraging authors' work. The PAJN aims to provide neurosurgeons with the latest research and information in a format that is useful for improving patient care in Arab countries and worldwide.

I would like to express my gratitude to the members of the editorial and reviewer boards for their expertise and dedication over the past 42 months. The editorial and reviewer teams have worked tirelessly to enhance the PAJN in various ways. Our world-class editorial board members and reviewers have promoted the journal on numerous occasions, contributing to its success.

I extend my thanks to our readers and authors from around the world for their trust in our journal. I assure you that we will continue to deliver high-quality publications to the neurosurgical community in Arab countries and beyond through the vehicle of the PAJN.
